Carparks & Driveways

Introduction

Hanly Asphalt is part of the Hanly Group which is involved in road construction, quarrying, residential development and hospitality. The Hanly Group has been in existence since 1969.

Hanly Asphalt, a subsidiary of Hanly Quarries which has 40 years experience in the laying of roads, now has a dedicated a Surfacing Division for the laying of driveways and carparks.

The company provides the efficiency of a one-stop-shop in the production, supply and laying of your driveway or carpark.

Services Provided

- From the laying of kerbing to the provision of drainage.
- Associated civils works.
- The supply and laying of an asphalt/macadam surfaced carpark or driveway.

Our Engineers and Contract Manager's will measure your site and provide you with a price.

AC10 & SMA10

We provide two surface finishes: -

Tarmacadam AC10 known as Asphalt Concrete 10

AC10 is used on national and non national roads, driveways and carparks.

Key Features:

- Durable
- Uniform even finish.
- Good load bearing material.
- Made from materials produced onsite to NSAI standards.

Tarmacadam SMA10 known as Stone Mastic Asphalt 10

SMA10 is used on driveways, carparks, private roads, house fronts and yards.

Key features:

- Durable
- High strength
- Good resistance to deformation.
- Made from materials produced onsite to NSAI standards.
